

## **PRESS RELEASE**

***European Network of Transmission System Operators for Gas (ENTSOG) calls on stakeholders to sign up for participation in SJWSs as part of the process of development of ENTSOG Ten-Year Network Development Plan (TYNDP) 2013-2022.***

TYNDP 2013-2022 will be already the 3rd edition of the non-binding Union-wide plan of infrastructure development and will build on the past experience and feedback received. As noted in the past, TYNDP is a 'living organism' and as such evolves along with the market dynamics it is expected to capture'. It is thus crucial that development of each new edition generally reviews the assumptions and methodologies used in the past and aims at enhancing as well as expanding them where necessary.

Vittorio Musazzi, ENTSOG General Manager, notes: 'Based on good practices established within ENTSOG during the first Network Code development on capacity allocation mechanisms, and to enable stakeholders to better understand as well as get actively involved in developing the TYNDP, ENTSOG would like to introduce the concept of Stakeholders' Joint Working Sessions (SJWSs) in the process.'

ENTSOG has identified the following areas as topics for the SJWSs:

- Supply
- Demand
- Infrastructure projects
- Security of supply
- Market Integration

ENTSOG would therefore like to invite stakeholders to express their interest in the SJWSs as well as in the TYNDP development in general.
