

Speaking Notes

On 6th September 2017, Jan Ingwersen, ENTSOG General Manager, spoke at the Joint Power-to-Methane Workshop hosted by EBA, GIE and ERGaRon: **“ENTSOG's take on Gas Demand Scenarios for the European Clean Energy Future”**
(See below some ENTSOG positions, expressed by him).

ENTSOG works together with ENTSO-E on scenarios for TYNDP 2018 and examines interlinkages between electricity and gas systems.

P2G potential deserves careful quantification: what are the relevant European scale figures?

We believe that aligning the timeline and way of thinking about the future of electricity and gas systems by both ENTSOs is very important.

Join us in the work to develop TYNDP 2018 and our discussions at the ENTSOs workshop on Scenario Development on 9th October 2017.
