

Press Release

ENTSOG publishes the project groups of Project-Specific Cost-Benefit Analysis

(Brussels, 26 October, PR0171-18) **Today, ENTSOG publishes the project groups of Project-Specific Cost-Benefit Analysis (PS-CBA groups) as part of the Ten-Year Network Development Plan 2018 (TYNDP 2018). PS-CBA is performed as part of the TYNDP process and PS-CBA groups are the basis for the project-specific assessment.**

For the first time, PS-CBA is performed as part of the TYNDP process to support the selection process of Projects of Common Interest (PCI, in accordance with Regulation (EU) 347/2013. The PS-CBA groups include only those projects whose promoters have expressed their intention to apply for the next (4th) PCI round during the TYNDP 2018 project collection process.

The list of projects groups is available on the ENTSOG website, [here](#).

The PS-CBA grouping is based on the principles described in section 3.1 of the “**2nd ENTSOG methodology for cost-benefit analysis of gas infrastructure projects**” available [here](#).

Some projects will not be modelled under PS-CBA. These projects have not been included in the PS-CBA groups but are available in the spreadsheet “Not-modelled projects” together with the reason for non-modelling.

The results of PS-CBA modelling will be published in the final TYNDP and will allow provision of technical support to promoters while ensuring a level-playing field and a transparent assessment towards all stakeholders.

Should you require any further information please contact Ms Carmel Carey, External Communication Adviser (+32 2 894 5136, ENTSOG.Communications@entsog.eu).

Editorial notes

- > ENTSOG was founded on 1 December 2009 in line with Regulation (EC) 715/2009. The current number of Members, Associated Partners and Observers can be found [at this link](#).
- > In line with Articles 6, 7 and 8 of the Regulation (EC) 715/2009, ENTSOG has the task of formulating network codes in a number of areas and of adopting various communications: a non-binding community-wide Ten-Year Network Development Plan on biennial basis; Winter and Summer Supply Outlooks; common network operation tools; recommendations relating to the coordination of technical cooperation between community and third-country-TSOs; annual work programmes and annual reports.
