

Speaking Notes

On 22nd June, **Jan Ingwersen**, ENTSOG General Manager, spoke at the GIE Annual Conference in Prague. “ **ENTSOG’s take on Gas Demand Scenarios for the European Clean Energy Future**” (See below some of ENTSOG positions, expressed by him)

ENTSOG has received criticism from NGOs and others - and is ready for dialogue to explain and discuss our work. In any case we will continue improving processes, data and outcomes of the TYNDPs

Some of the criticism focuses on sustainability only, but ENTSOG is also taking into account competition, diversification and security of supply

TYNDPs scenarios test resilience of the gas infrastructure in possible future conditions: TYNDP scenarios are possible future developments – not visions nor forecasts

ENTSOG teams up with ENTSO-E in order to build next scenarios for TYNDP 2018
