

Press Release

A solution for reported auction restrictions is published as part of the Gas Network Codes Functionality process

(Brussels, 4 June, PR0209-20) Today, the European Union Agency for the Cooperation of Energy Regulators (ACER) and the European Network of Transmission System Operators for gas (ENTSOG) published - on their co-managed Gas Network Codes Functionality Platform - a solution for 'annual and quarterly auction restrictions in the German NCG market area, as reported on the gas capacity trading platform PRISMA'.

The solution provides a number of criteria to consider when reallocating capacities from interconnection points to domestic exit points in exceptional cases.

The [Gas Network Codes Functionality Platform](#) addresses issues reported by registered users related to the implementation of gas Network Codes and Guidelines. You can find all related documents [here](#).

Should you require any further information, please contact Carmel Carey (+32 2 894 5136, ENTSOG.Communication@entsog.eu).

Editorial notes

- > **European Network of Transmission System Operators for Gas (ENTSOG)** was founded on 1 December 2009 in line with Regulation (EC) 715/2009 to promote the completion of the internal market for gas by facilitating cooperation between national gas transmission system operators (TSOs) across Europe and in line with European Union energy goals. More information can be found on the ENTSOG website – www.entsog.eu. The current number of Members, Associated Partners and Observers can be found at www.entsog.eu/members.
