

The different common data exchange solutions shown in column I are defined in the Interoperability Network code Art 21.

"Recommendation" (see column K) is used in cases where communications are identified in the BRS document (business requirement specification) which are not explicitly part of the network code. As such the proposed solution is not enforceable but is to be considered as a "recommendation" to encourage harmonisation, and are to be negotiated bilaterally on a case by case basis.

"Optional" (see column K) is not mandatory but can be offered, **as may any other communication option**

"Date of Publication" (see column J) After a **lead time of 12 months** starting from the date of publication, the TSOs or parties "acting on behalf of TSOs" shall make the Common Data Exchange Solution available for use with their counter parties.

Derogations:

In the case of Member States which are not connected to the interconnected EU network and hold a derogation (re Art 49 of directive 2009/73/EC), the Common Data Exchange Solution should be made available not later than the time of the establishment of the connection with the interconnected EU network (see also Art1 (2) Network code Interoperability)
