

**Demand assessment report
for incremental capacity**

between

UK (National Grid Moffat IP)

and

Republic of Ireland (Gas Networks Ireland)

***where no non-binding demand indications
were received***

October 2021

This report is a joint assessment of the potential for incremental capacity projects conducted by:

National Grid Gas Transmission

Gas Networks Ireland

Warwick Technology Park

Gasworks Road

Gallows Hill

Table of contents

A. Non-binding Demand indications	4
B. Demand assessment	5
Expected amount, direction and duration of demand for incremental capacity	5
C. Conclusion for the (non)-initiation of an incremental capacity project/process	6
D. Fees	7
E. Contact information	8

A. Non-binding Demand indications

The involved TSOs, National Grid and GNI (UK) Limited have not received any non-binding demand indications for firm capacity at the interconnection points between the entry-exit system of National Grid and the entry-exit system of GNI (UK) Limited for any future period.

a) non-binding demand indications received within 8 weeks after the 5th July 2021 - none

Therefore, the amount of zero for non-binding demand indications has been used as a basis for this demand assessment.

B. Demand assessment

Expected amount, direction and duration of demand for incremental capacity

The received demand indications within the current incremental process between the entry-exit system of National Grid and the entry-exit system of GNI (UK) Limited are zero and therefore the potentially available capacity (i.e. technical capacity which is not yet booked in the long term) for the requested period are currently sufficient to cover potential future need for capacity.

C. Conclusion for the (non)-initiation of an incremental capacity project/process

According to the assessment result of the non-binding demand indications which already indicated that no demand levels for incremental capacity need to be developed, no incremental capacity project will be initiated.

Based on the aforementioned decision, no technical studies for incremental capacity projects will be conducted.

D. Fees

National Grid

A fee would have been required for the submission of any demand indications in accordance with UNC EID Section E, in order to fund technical design studies. As no demand indications were received, National Grid did not receive any fees for the evaluation and processing of non-binding demand indications

GNI

Gas Networks Ireland did not introduce a fee for the evaluation and processing of non-binding demand indications

E. Contact information

National Grid Gas Transmission

Belinda Agnew,

Gas Connections Contract Manager
