

Press Release

ENTSOG publishes the Capacity Allocation Mechanisms (CAM) Network Code ‘Capacity Auction Calendar’ for 2023/2024

(Brussels, 13 January, PR0285-23) **The ‘Auction Calendar’ for 2023/2024, containing information on specific capacity auctions, is now available on ENTSOG’s website.**

The Network Code on Capacity Allocation Mechanisms requires ENTSOG to publish an Auction Calendar by each January for auctions taking place from March through February of the following year. This calendar provides all relevant timings for auctions, including starting dates and standard capacity products to which they apply.

Key auction dates for firm capacity are:

- Annual yearly capacity auction – 3 July 2023.
- Annual quarterly capacity auctions – 7 August 2023, 6 November 2023, 5 February 2024, and 6 May 2024.
- Rolling monthly capacity auctions – third Monday of M-1, with exceptions, in particular if the date corresponds with a European public holiday. In this case, the auction will be postponed to the next day following the European bank holiday.
- Rolling day-ahead capacity auctions – D-1, 14:30 (UTC) during daylight saving time, 15:30 (UTC) during wintertime
- Within-day capacity auctions – each hour for the period starting from +4 hours until the end of the gas day

Dates for interruptible capacity auctions are also included and must be considered as the European standard defaults. The **Auction Calendar for 2023/2024** is available [here](#).

Should you require any further information please contact external Communications Manager Ms. Carmel Carey at ENTSOG.Communications@entsog.eu).

Editorial notes

- > **The European Network of Transmission System Operators for Gas (ENTSOG)** was founded in line with Regulation (EC) 715/2009 and has played a key role in facilitating integration of the European gas markets, ensuring technical interoperability and providing security of supply by gas infrastructure planning. Looking forward, ENTSOG is contributing to the net-zero decarbonisation by 2050, in particular, by the integration of renewable and low carbon gases via future-proof gas transmission pipelines, in line with the EU energy and climate goals. More information on ENTSOG can be found on our website – or contact info@entsog.eu.
