

Press Release

ENTSO-E and ENTSG launch public consultation on TYNDP 2024 Scenarios Input Parameters and announce stakeholder roundtables

(Brussels, 4 July 2023, PR0296-23) **Today, ENTSO-E and ENTSG publish their Storyline Report and several key underlying data sets and modelling methodologies as a first deliverable in the formal process for TYNDP 2024 scenario building, as required by Regulations 943/2019 and 715/2009. All stakeholders are invited to provide feedback until 8 August 2023.**

This Storyline Report builds on the TYNDP 2022 Storyline Report and considers changes proposed via stakeholder feedback during the TYNDP 2022 scenario cycle and during the [Storyline Review Webinar in July 2022](#). As part of ENTSO-E and ENTSG's goal of improved quantification of underlying assumptions for TYNDP 2024 scenarios, the report also includes detailed datasets on several key topics such as demand, supply, modelling methodologies and carbon budget. The carbon budget methodology will be shared with stakeholders on 11 July.

To provide more information on the published datasets and offer stakeholders the opportunity to ask questions, a [consultation hybrid workshop](#) will take place on 13 July between 10:00 and 12:00 CEST. In addition to this webinar, a selection of [stakeholder roundtables](#) will also be held on 13 July between 13:00 and 17:15, to allow the Scenario Building Team to discuss key topics and datasets with stakeholders in more depth on the demand, supply, modelling methodologies and carbon budget topics. A summary of the discussion in each roundtable will subsequently be published on the TYNDP 2024 scenarios website.

The ENTSO-E and ENTSG TYNDP 2024 Storyline Report can be found on a dedicated website, [here](#). The Scenarios input datasets and modeling methodologies are available [here](#) and the demand data visualisation tool [here](#).

Stakeholder feedback can be provided until 8 August, [via an online form](#). Input from stakeholders from all sectors is welcome. Stakeholders interested in attending the consultation webinar may register [here](#).

The draft TYNDP 2024 Scenario Report, taking into account results of the stakeholder feedback, is expected to be published in late 2023 for consultation. The TYNDP 2024 Scenario Report is expected to be finalised in 2024.

Should you require any further information, please contact Ms. Carmel Carey at ENTSOG.Communications@entsog.eu or Ms. Léa Dehautt (lea.dehautt@entsoe.eu).

Editorial notes

- > [The European Network of Transmission System Operators for Gas \(ENTSOG\)](#) was founded in line with Regulation (EC) 715/2009 and has played a key role in facilitating integration of the European gas markets, ensuring technical interoperability and providing security of supply by gas infrastructure planning. Looking forward, ENTSOG is contributing to the net-zero decarbonisation by 2050, in particular, by the integration of renewable and low carbon gases via future-proof gas transmission pipelines, in line with the EU energy and climate goals. More information on ENTSOG can be found on our website – or contact info@entsog.eu.
- > **ENTSO-E**, the European Network of Transmission System Operators for Electricity, is the association for the cooperation of the European transmission system operators (TSOs). The [39 member TSOs](#), representing 35 countries, are responsible for the secure and coordinated operation of Europe's electricity system, the largest interconnected electrical grid in the world. In addition to its core, historical role in technical cooperation, ENTSO-E is also the common voice of TSOs – www.entsoe.eu.
