Press Release

ENTSOG commences project collection for its Ten-Year Network Development Plan 2024

(Brussels, 23 November, PR0307-23**) Today, ENTSOG has commenced the project collection process for its Ten-Year Network Development Plan 2024 (TYNDP 2024). Project promoters are requested to submit their projects during the 'Project Submission Phase' between 23 November and 22 December 2023.**

Project promoters who have already submitted their projects for TYNDP 2022 are required to re-submit their projects and provide up-to-date data to allow their projects to be considered for TYNDP 2024. Submission is possible via an online questionnaire. Login credentials can be provided by the ENTSOG team.

Project promoters can make a submission using the following project subcategories:

- For Hydrogen infrastructure projects:
  - (i) Hydrogen transmission pipelines (H2T)
  - (ii) Hydrogen storage facilities (H2S)
  - (iii) Hydrogen reception facilities (H2L)
  - (iv) Hydrogen in the transport sector for mobility (H2M)
  - (v) Electrolysers for hydrogen production (H2E)

- For Natural Gas infrastructure projects:
  - (i) Gas transmission pipelines (TRA)
  - (ii) Underground storage facilities (UGS)
  - (iii) Reception and storage and regasification or decompression facilities for liquefied natural gas (LNG)

- For Smart Gas Grid infrastructure projects:
  - (i) Retrofitting projects to integrate hydrogen blends (RET)
  - (ii) Biomethane development projects (BIO)
  - (iii) Synthetic methane projects (SYN)

- For Others project categories:
  (i) Repurposing of natural gas infrastructure for CO2 transport and/or storage (CO2)
  (ii) Other infrastructure related projects (OTH)

All submitted projects are required to comply with specific administrative and technical criteria for their inclusion, as defined in the "ENTSOG Final Guidelines for Project inclusion (GPI) for TYNDP 2024", available here.

Practical information to support promoters' applications to TYNDP 2024 can be found on the ENTSOG Data Portal Handbook (available here) and supporting material (available here). The recording of a recent webinar providing useful information for the TYNDP 2024 Project Collection process can be found here.

Should you require any further information regarding the data collection process, please contact:
Mr. Pierre Marani (Pierre.Marani@entsog.eu) and
Ms. Maria Castro (Maria.Castro@entsog.eu) and

Editorial notes

The European Network of Transmission System Operators for Gas (ENTSOG) was founded in line with Regulation (EC) 715/2009 and has played a key role in facilitating integration of the European gas markets, ensuring technical interoperability and providing security of supply by gas infrastructure planning. Looking forward, ENTSOG is contributing to the net-zero decarbonisation by 2050, in particular, by the integration of renewable and low carbon gases via future-proof gas transmission pipelines, in line with the EU energy and climate goals. More information on ENTSOG can be found on our website – www.entsog.eu or contact info@entsog.eu
