

Press Release

ENTSOG releases third episode of its ENTSOG Talks podcast series focusing on tariff-setting for EU transmission networks

(Brussels, 31 May, PR0321-24) **As part of the ENTSOG Talks podcast series and in advance of the soon-to-be published ENTSOG report on the Implementation and Effect monitoring of the Tariff Network Code (TAR NC), members of the ENTSOG team discuss the benefits as well as challenges of tariff-setting for EU gas and hydrogen transmission networks.**

Earlier this month, **ENTSOG Senior Market Adviser, Laurent Percebois**, provided his views on the importance of transmission tariffs for the transparent functioning of the EU gas market. He also discusses the possible impacts of the recent Hydrogen and Decarbonised Gas Market legislative package on the gas Network Codes and the potential tariff regime that could be implemented for the transmission of hydrogen.

Other episodes in the ENTSOG Talks series include a discussion with previous **ENTSOG Subject Manager for Transparency, Kathrine Stannov**, who gave her perspectives on transparency, data reporting and market integrity in the European energy landscape. In November 2023, **ENTSOG General Director, Piotr Kuś**, describes his role as well as ENTSOG's current objectives and ambitions for a decarbonised future.

Piotr commented, *"ENTSOG is currently using a number of tools and platforms to most effectively share information with stakeholders. Podcasting is an additional communication tool to inform on ENTSOG activities and to promote the detailed work of the individuals in the ENTSOG team. We look forward to sharing future episodes with you in the coming months."*

All episodes are available on [Spotify](#) and the [ENTSOG website](#).

Should you require any further information, please contact Ms. Carmel Carey, ENTSOG.Communications@entsog.eu.

Editorial notes

- > **The European Network of Transmission System Operators for Gas (ENTSOG)** was founded in line with Regulation (EC) 715/2009 and has played a key role in facilitating integration of the European gas markets, ensuring technical interoperability and providing security of supply by gas infrastructure planning. Looking forward, ENTSOG is contributing to the net-zero decarbonisation by 2050, in particular, by the integration of renewable and low carbon gases via future-proof gas transmission pipelines, in line with the EU energy and climate goals. More information on ENTSOG can be found on our website – www.entsog.eu or contact info@entsog.eu.
