

Press Release

ENTSOG publishes draft guidance documents for TYNDP 2024 and opens stakeholder consultation

(Brussels, 19 June, PR0324-24) **Today, ENTSOG published draft guidance documents for the Ten-Year Network Development Plan (TYNDP) 2024 and opens consultation for stakeholder feedback until 9 July 2024.**

These documents form Annex D of the TYNDP 2024 and provide a comprehensive description of the methodologies and assumptions being used for the deliverables of the TYNDP. Annex D is split into the following three documents:

- Annex D1 Implementation Guidelines (IG) for the project-specific Cost-Benefit Analysis
 of hydrogen sector candidates for the status of Project of Common Interest (PCI) or Project
 of Mutual Interest (PMI).
- Annex D2 Hydrogen Infrastructure Gaps Identification (IGI) methodology. The IGI part of the TYNDP 2024 System Assessment report will be published as a self-standing document.
- Annex D3 Methodology for all other deliverables of the TYNDP, which are not used for the selection process of PCIs and PMIs.

2024, using this <u>public consultation questionnaire</u>, after which time ENTSOG will consider the stakeholder feedback as a basis to develop the draft TYNDP 2024 for publication.

The public consultation questionnaire additionally includes a question related to ENTSOG's biannual long-term gas quality monitoring outlook, which is being prepared in parallel to the TYNDP 2024.

As part of the consultation process, interested stakeholders are invited to join a dedicated webinar on **24 June 2024**, at which the content of the draft documents will be presented and stakeholder questions addressed. Registration is possible on the event page, <u>here</u>.

As required by Article. 13 (1) of Regulation (EU) 2022/869 (TEN-E Regulation), ENTSOG would welcome feedback from the following stakeholders and their involvement in the consultation process: the EU DSO entity, associations involved in electricity, gas and hydrogen markets, heating and cooling, carbon capture and storage and carbon capture and utilisation stakeholders, independent aggregators, demand-response operators, organisations involved in energy efficiency solutions, energy consumer associations, civil society representatives, ACER, and Member States' representatives.

The draft documents are available on the ENTSOG website, here.

Should you require any further information, please contact Ms. Carmel Carey, ENTSOG.Communications@entsog.eu.

Editorial notes

> The European Network of Transmission System Operators for Gas (ENTSOG) was founded in line with Regulation (EC) 715/2009 and has played a key role in facilitating integration of the European gas markets, ensuring technical interoperability and providing security of supply by gas infrastructure planning. Looking forward, ENTSOG is contributing to the net-zero decarbonisation by 2050, in particular, by the integration of renewable and low carbon gases via future-proof gas transmission pipelines, in line with the EU energy and climate goals. More information on ENTSOG can be found on our website – www.entsog.eu or contact info@entsog.eu.
