

Press Release

ENTSOG opens stakeholder consultation on its draft Annual Work Programme (AWP) 2026

(Brussels, 14 July, PR0347-25) **Today, ENTSOG launched a public consultation on its Annual Work Programme 2026 and is inviting stakeholders to contribute in defining the right priorities and to identify the most relevant projects for ENTSOG in 2026. The consultation remains open until 5 September 2025.**

Piotr Kuś, ENTSOG General Director, said, *“ENTSOG’s tasks in 2026 span more than just those required by regulation. For example, we will work to address the requests arising from two energy regulatory fora in Madrid and Copenhagen in 2025, to develop a mid-term infrastructure assessment framework, implementation of the Interlinked Model in TYNDP 2026 and development of possible de-risking options for hydrogen projects. As ever, we look forward to continued collaboration with ENNOH, ENTSO-E and other relevant stakeholders on joint tasks, and to address the needs of the Clean Industrial Deal with all stakeholders. We welcome your feedback on the draft Annual Work Programme 2026.”*

The draft AWP 2026 document and the consultation feedback questions are available on the ENTSOG website, [here](#).

Should you require any further information please contact External Communications Manager, Ms. Carmel Carey at ENTSOG.Communications@entsog.eu.

Editorial notes

- > **The European Network of Transmission System Operators for Gas (ENTSOG)** was founded in 2009 and has played a key role in facilitating integration of the European gas markets, ensuring technical interoperability and providing security of supply by gas infrastructure planning. Within the scope of Regulation (EU) 2024/1789 and other relevant legislation, ENTSOG is contributing to net-zero decarbonisation by the integration of renewable and low carbon gases via future-proof gas transmission pipelines, in line with the EU energy and climate goals. More information on ENTSOG can be found on our website www.entsog.eu or contact info@entsog.eu.
