

***Public Consultation on
Draft ENTSG Annual Work Programme (AWP) 2027
Stakeholder Feedback***

Organisation: TRANSPORTGAS SRBIJA

Name: Nenad Banjac

Q1: Does the AWP 2027 adequately identify activities which ENTSG should prioritise? If not, please provide details.

Yes. We consider that the AWP 2027 adequately identifies the key priorities for gas TSOs, including Network Code implementation, interoperability, gas quality and cooperation with Energy Community TSOs.

Q2: Are there any other activities that should be included in the AWP 2027, or activities which should take priority within the document? If yes, please provide details.

We would particularly welcome continued practical support for Energy Community TSOs in the implementation of the Balancing Network Code and further work on regional gas quality harmonisation.

Q3: Do you have any additional general comments?

We agree with ENTSG's assessment that the existing Interoperability Network Code is fit for purpose and that any future amendments should be targeted and based on identified operational needs.

Nenad Banjac,
Head of Capacity Management Sector
