

Invitation CEN-ENTSOG workshop on WI and
GCV in Europe
CEN SFGas GQS WG Doc N 027
ENTSOG INT1177-170830
30 August 2017
Rev 1

Dear Members of CEN SFGas GQS,
Dear ENTSOG stakeholders,

We are pleased to invite you to the Workshop "Wobbe index and gross calorific value in the European gas chain (CEN SFGas GQS survey)", jointly organised by CEN and ENTSOG as concluded at the last CEN SFGas GQS TF 1 meeting.

In this Workshop we will inform you about the current results from the gas quality data survey carried out by CEN Sector Forum Gas and EC JRC in the context of the "Pre-normative Study of H-gas quality parameters" (short CEN SFGas GQS). ENTSOG as coordinator of TSOs input and JRC will present the data gathered from TSOs, DSOs and end users and will have an exchange with the audience on possible methodologies for the forthcoming analysis of the data. The survey is intended to illustrate the gas quality distributed in different European countries as complementary information for the scenario proposals and assessments on Wobbe index or Calorific values to be realised in the dedicated CEN SFGas task forces.

Additionally, ENTSOG will give an insight into the preparatory work of the Gas Quality Outlook 2018 which could also contribute relevant information to the CEN SFGas GQS analysis.

Last but not least, Marcogaz will offer a view on the effects of hydrogen on Wobbe Index, an aspect which is not yet placed in the CEN SFGas GQS.

The workshop will take place on 28 September 2017 at: **Thon Hotel EU, Rue de la Loi/Wetstraat 75, B-1040 Brussels, hosted by ENTSOG.**

We will be glad to welcome you to the joint Workshop!
