

11-th ENTSOG Transparency Workshop, Vienna – 6 December 2017

Standardized section for tariff data publication on TSO/NRA websites

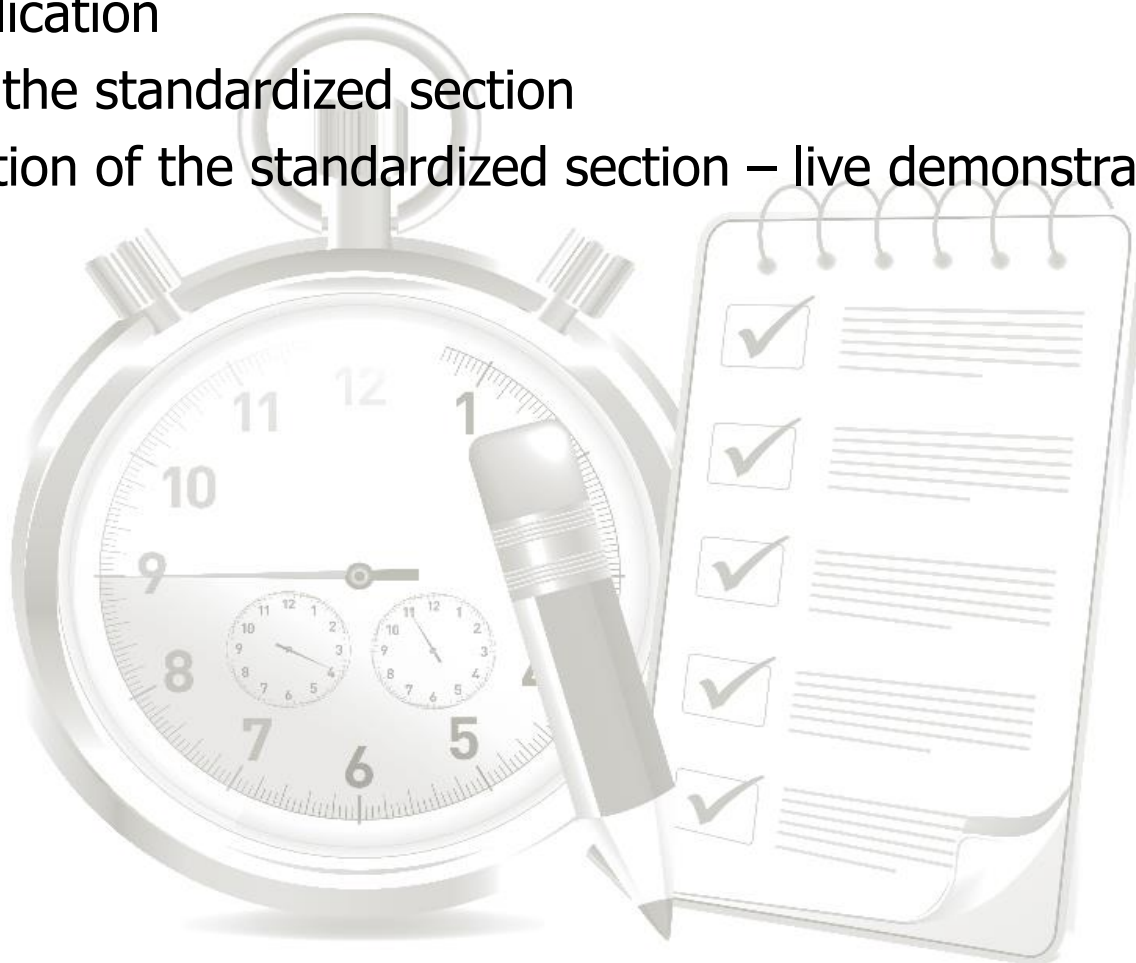

Implementation approach

Maria Gerova

IT Project Manager, Bulgartransgaz

Agenda

1. Tariff network code - publication requirements
2. Form of publication
3. Structure of the standardized section
4. Implementation of the standardized section – live demonstration

Publication requirements

To be published no later than 30 days before the annual yearly capacity auction

Article 29, TAR NC

- Reserve prices for standard **FIRM** products
 - > Multipliers
 - > Seasonal factors
 - > Relevant justifications
- Reserve prices for standard **INTERRUPTIBLE** products
 - > Probability of interruption
 - > Discounts

To be published no later than 30 days before the tariff period

Article 30, TAR NC

- Methodology parameters
- Revenue information
- Other tariffs not published before the annual auctions
- Tariffs evolution
- Simplified model allowing tariffs calculation & estimation of their evolution

Form of publication

Tariff information on TSOs/NRAs web-sites

Tariff NC, Article 31

Form of publication

The required information shall be accessible to the public, free of charge and of any limitations as to its use. It shall be published:

- > Via link on ENTSG TP
- > In a user-friendly manner
- > In a clear, easily accessible way and on a non-discriminatory basis
- > In a downloadable format
- > In the official for the MS and in EN languages

*"With the aim to facilitate the access to the required information and enhance the market transparency, as voluntary activity ENTSG and the TSOs developed **standardized format** for tariff publications on TSOs/NRAs web-sites".*

Structure of the standardized section

Tariff information on TSOs/NRAs web-sites

TAR NC	Description	Link	Further Information
Information to be published before the annual yearly capacity auction			
Art. 29 (a)	Information for standard capacity products for firm capacity (reserve prices, multipliers, seasonal factors, etc.)	Link to the information of the TSO website	
		Link 2	
		Link 3	
Art. 29 (b)	Information for standard capacity products for interruptible capacity (reserve prices and an assessment of the probability of interruption)	Link to the information of the TSO website	
		Link 2	
		Link 3	

Structure of the standardized section

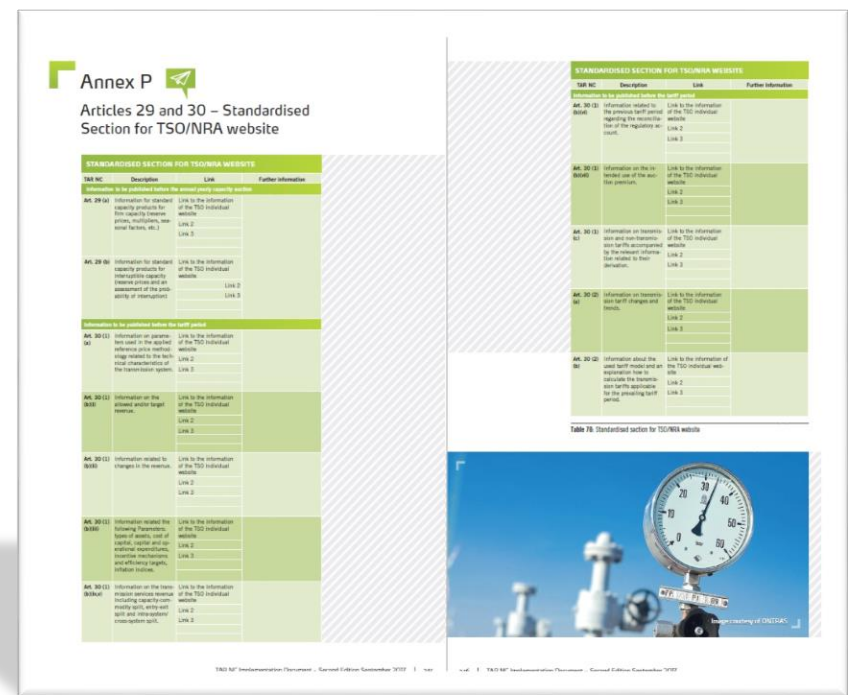

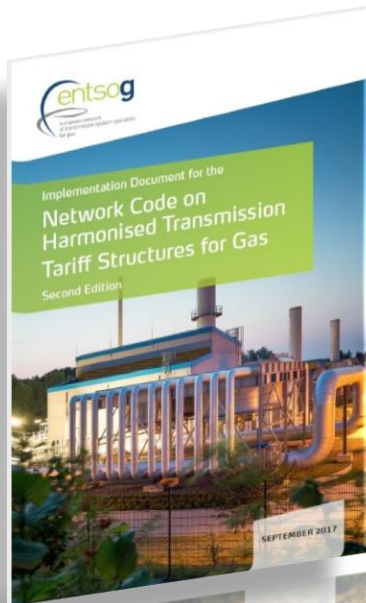

Tariff information on TSOs/NRAs web-sites

TAR NC	Description	Link	Further Information
Information to be published before the tariff period			
Art. 30 (1)(a)	Information on parameters used in the applied reference price methodology related to the technical characteristics of the transmission system.	Link to the information of the TSO website	
		Link 2	
		Link 3	
Art. 30 (2)(b)	Information about the used tariff model and an explanation how to calculate the transmission tariffs applicable for the prevailing tariff period.	Link to the information of the TSO website	
		Link 2	
		Link 3	

Standardized section - more details

ENTSOG Implementation Document on TAR NC

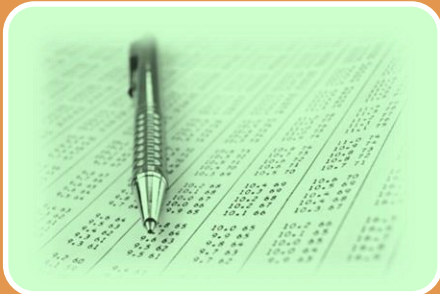

www.entsog.eu: Market -> Tariffs -> TAR NC Implementation -> 2nd Implementation Document

Standardized section - implementation

Something to take away

Increased transparency of transmission tariffs

**More data
available up
to
TAR NC
requirements**

Easy to find

**Uniform
publication
structure**

Thank you for your attention!

An aerial photograph of a large industrial gas processing plant, likely a compressor station, featuring several large cylindrical vessels and a complex network of pipes. The facility is situated in a flat, open landscape with hills in the background. Overlaid on the lower portion of the image is a map of Bulgaria, with a network of red and blue lines representing gas pipelines. The map also shows various administrative boundaries and smaller pipeline routes.
