

Business Requirement Specifications for Nomination (NOM) Consultation Questions

Introduction

As a result from the stakeholders' consultation process, the draft NC on interoperability and data exchange rules proposes that ENTOSOG should have the task of preparing **common network operation tools (CNOTs)** wherever data exchange requirements are identified within the developed network codes. For each identified data exchange requirement, the CNOTs will include a business requirement specification (BRS) and a technical implementation guideline (IG).

ENTOSOG welcomes all stakeholders' feedback on the proposed BRS Nominations document ([add link to the document here](#)) arising from Balancing Network Code as well as Interoperability & Data Exchange Network Code during the consultation period. Stakeholders are asked to please respond to the following questions via an online response form **by 5.00pm (CET) on Friday, than 14 March 2014.**

If you have any additional question or comment, or any technical difficulty in completing the online response form, please contact Monika Kaldonek monika.kaldonek@entsog.eu or Jef De Keyser jef.dekeyser@entsog.eu.
