

3rd ENTSOG Workshop on Interoperability Network Code regarding Gas Quality

Brussels, 16 November 2016

marcogaz
TECHNICAL ASSOCIATION
OF THE EUROPEAN NATURAL GAS INDUSTRY

Jos Dehaeseleer

Secretary General

- **Although the decision of the Madrid Forum not to pursue legally binding provisions of EN16726:2015,**

MARCOGAZ thanks ENTSOG for their approach, efforts and is grateful for the work done

- gathering all stakeholders of the gas chain around the table
- organising 2 public consultations
- listing the remaining issues - bottlenecks
- seeking for arguments and impact assessments
- ...

contributing to the future of Natural Gas in Europe.

➤ **We should now:**

- analyse these remaining technical issues hindering the harmonisation
- identify their technical solutions
- analyse the cost benefits
- evaluate the global European economical impact to solve these issues

➤ **A European standard including all relevant gas quality parameters for H-gas, has to be available as soon as possible**

- to facilitate and foster the free circulation of gases including LNG and renewable gases (biomethane, syngas, ...)
- to foster the free circulation of the appliances

- **MARCOGAZ welcomes the Madrid Forum decision confirming its support for CEN to carry on the work**
 - on finding an agreement on a band for the Wobbe Index, elaborating on the possibility of regional bands, to be included in an updated CEN standard
 - while ensuring the integrity of the existing standard
 - and calls on market participants to be constructively engaged in this process.

Thank you !
