

## *Press Release*

### **ENTSOG organises a workshop on “Interoperability NC data exchange requirements” and asks feedback on the suggested Common Network Operation Tools (CNOT)-Process**

(Brussels 21 January 2014, PR057-14) As required by regulation (EC) 715/2009 Transmission System Operators (TSOs) shall develop common network operation tools to ensure the coordination of network operation.

On 25 February 2014 ENTSOG organizes a workshop for stakeholders in Brussels to cover following topics:

- Common network operation tools – development process: As required by regulation 715/2009 TSOs shall develop common network operation tools to ensure coordination of network operation.
- AS4 Usage profile definition: The Interoperability and Data Exchange Rules Network Code foresee AS4 as a common data exchange protocol for document based data exchanges (as outcome of the CBA performed by ENTSOG during INT&DE NC development process).

On the workshop’s agenda are also the Business Requirement Specifications (BRS), pilot project results on nomination and matching and the usage profile definition of AS4, a common data exchange protocol.

Registration to participate in the workshop (industry only) can be done online on the ENTSOG website ([Link](#)).

In addition stakeholders are asked to give feedback on the CNOT process document. It describes wherever data exchange requirements are identified within the developed network codes and how to develop CNOTs, which will include a business requirement specification (BRS) and a technical implementation guideline (IG)

The consultation starts today and feedback on the proposed [CNOT process document](#) can be given during the consultation period until 14 March 2014 following this [link](#).

Should you require any further information please contact Monika Kaldonek (+32 2 894 5127, [monika.kaldonek@entsog.eu](mailto:monika.kaldonek@entsog.eu)) or Jef de Kaiser (+32 2 894 5132; [jef.DeKeyser@entsog.eu](mailto:jef.DeKeyser@entsog.eu))

#### **Editorial notes**

- > ENTSOG was founded on 1 December 2009 in line with Regulation (EC) 715/2009. The current number of Members, Associated Partners and Observers can be found [under this link](#).
- > In line with Articles 6, 7 and 8 of the Regulation (EC) 715/2009, ENTSOG has the task of formulating network codes in a number of areas and of adopting various communications: a non-binding community-wide Ten-Year Network Development Plan on biennial basis; Winter and Summer Supply Outlooks; common network operation tools; recommendations relating to the coordination of technical cooperation between community and third-country-TSOs; annual work programmes and annual reports.
