

Press Release

ENTSOG and ENTSO-E launch joint public consultation on Europe's future TYNDPs 2018 scenarios

(Brussels, 12 May 2016, PR0108-16) **ENTSOG and ENTSO-E have started the scenario development process for the TYNDPs 2018. Today, both associations invite you to participate in their joint consultation on scenarios for the TYNDPs 2018. The consultation will be open until 12 June.**

What we assume today sets the frame under which the future is analysed. This is the reason why, when developing the electricity and gas TYNDPs, ENTSOG and ENTSO-E are looking into what the future may look like. The electricity and gas are independent systems but they are interlinked with each other. Therefore today ENTSOs are asking both electricity and gas stakeholders to give their vision of the future.

The consultation starts today and will be open until 12 June. To answer to this **web-based consultation**, we invite you to follow this [link](#).

An **overview of all the questions** can be downloaded [here](#).

Jan Ingwersen, ENTSOG General Manager, said: *“ENTSOG encourages all the stakeholders interested in the future gas and electricity infrastructure and in scenario development to participate to this joint consultation.”*

Stakeholders' feedback will be used by the ENTSOs in drafting the final scenarios storylines for the TYNDPs 2018. Based on them ENTSOs will complete the picture with the associated data so that the scenarios turn into concrete results. Along the way ENTSOs will continue asking feedback during the coming stakeholder engagement process.

On **2 June**, in the middle of the consultation period **ENTSOG and ENTSO-E** will hold a **joint public workshop on the scenarios assumptions**. More information can be found [here](#).

You will find more information about the TYNDPs here:
