

Press Release

European Network of Transmission System Operators for Gas publishes the System Development Map 2015/2016 in cooperation with Gas Infrastructure Europe.

(Brussels, 14 September 2016, PR0114-16) The European Network of Transmission System Operators for Gas (ENTSOG), in cooperation with Gas Infrastructure Europe (GIE), has published the fifth edition of the map illustrating the development of gas supply, demand and infrastructure over 2015 and the first quarter of 2016.

Based on feedback received on the previous editions, the new map covers additional information and has an improved graphical layout.

Jan Ingwersen, ENTSOG General Manager, said, *“The System Development Map, like the Seasonal Reviews, inform about the most recent supply and demand trends. I hope that this latest edition will continue to be useful to the market and institutions for their analyses.”*

Boyana Ačovski, GIE Secretary General, said: *“GIE and ENTSOG members are jointly demonstrating, once again, their commitment to offer useful information to stakeholders.”*

ENTSOG and GIE are committed to further enhancing the information provided on the map in the future and welcome feedback from stakeholders.

The map is available for download at ENTSOG <http://www.entsog.eu/maps/system-development-map> and GIE <http://www.gie.eu/index.php/maps-data/system-development-map>.

All maps published by ENTSOG can be ordered at <http://maps.entsog.eu>

Should you require any further information please contact Stefan Greulich (+32 2 894 5106, stefan.greulich@entsog.eu).

Editorial notes

- > ENTSOG was founded on 1 December 2009 in line with Regulation (EC) 715/2009. The current number of Members, Associated Partners and Observers can be found [at this link](#).
- > In line with Articles 6, 7 and 8 of the Regulation (EC) 715/2009, ENTSOG has the task of formulating network codes in a number of areas and of adopting various communications: a non-binding community-wide Ten-Year Network Development Plan on biennial basis; Winter and Summer Supply Outlooks; common network operation tools; recommendations relating to the coordination of technical cooperation between community and third-country-TSOs; annual work programmes and annual reports.
- > Gas Infrastructure Europe (GIE) is an association representing the interests of European natural gas infrastructure operators active in natural gas transmission, storage and LNG regasification. GIE is a trusted partner of European institutions, regulatory bodies and industry stakeholders. It is based in Brussels, the heart of European policymaking.
- > GIE currently represents 67 member companies from 24 countries. Its internal structure has three columns corresponding to the three types of infrastructure activities represented: GTE (Gas Transmission Europe), GSE (Gas Storage Europe) and GLE (Gas LNG Europe), all of which fall under the umbrella of GIE. This structure allows member companies to speak with one voice on infrastructure topics as well as to build positions on column-specific issues.
